Ms. Ramirez's behavior has been stable and uneventful and she denies any psychiatric problems or symptoms. She reports no side effects and none are in evidence. Problem Pertinent Review of Symptoms/Associated Signs and Symptoms: Psychotic, depressive, and anxiety symptoms are denied.

MENTAL STATUS EXAM: Mood is euthymic with no signs of depression or elevation. Her speech reveals no abnormalities of rate, volume, or articulation and her language skills are intact. She convincingly denies suicidal ideas. There are no signs of psychotic process. Her behavior is basically appropriate and there are no indications that hallucinations or delusions are present. There are no signs of a thought disorder. Associations are intact, thinking is generally logical, and thought content is appropriate. Cognitive functioning, based on vocabulary and fund of knowledge, is commensurate with her age and abilities. She is oriented to time and place and can remember recent and remote events. Patient is able to think abstractly. No signs of anxiety are present. There are no signs of hyperactive or attentional difficulties. Insight and judgment are generally intact.

CONTENT OF THERAPY:
The patient today spoke mainly about issues involving the workplace.

THERAPEUTIC INTERVENTION:
Instructions were given regarding providing peer support through common themes. This session the therapeutic focus was on emotional support.

DIAGNOSES: The following Diagnoses are based on currently available information and may change as additional information becomes available.

Post-traumatic stress disorder, unspecified, F43.10 (ICD-10) (Active)

INSTRUCTIONS / RECOMMENDATIONS / PLAN:
